# USB\_CONNECTOR

NOT Support usb charge

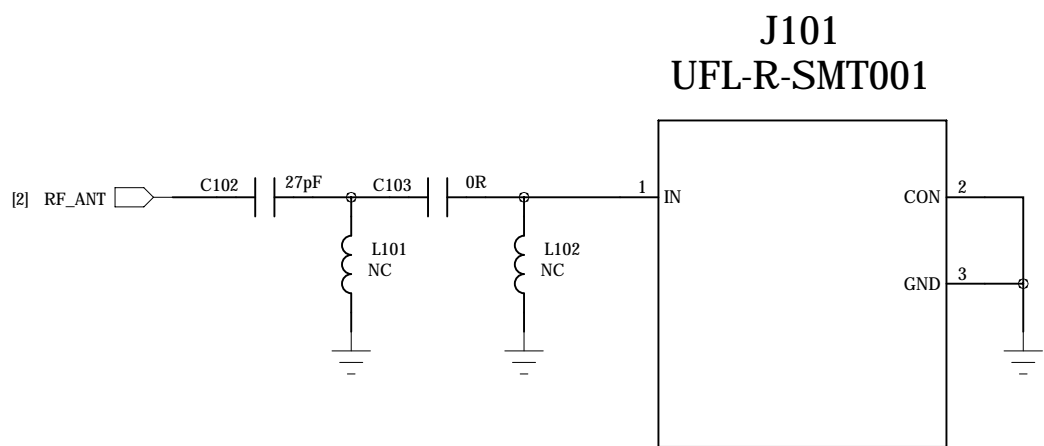

1. VR101/VR102 must be less than 2pF about junction capacitance
2. The USB\_DM and USB\_DP must route 90 ohm differential
3. Recommended that the rated voltage of the capacitance on the Vbus net is 25V.

# L206X MODULE

# Antenna Connector

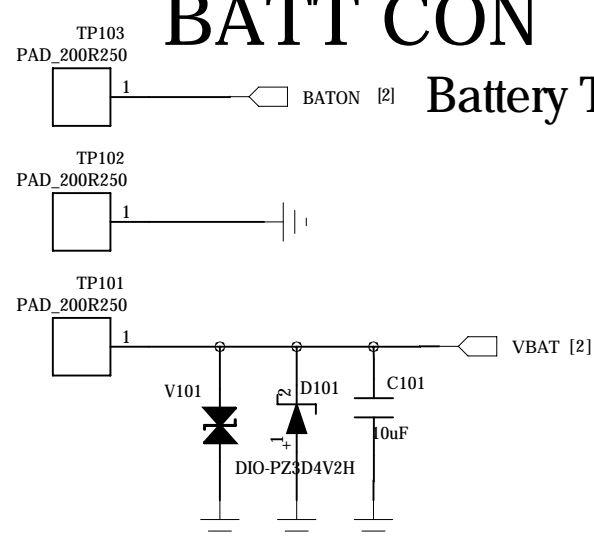

# BT Connector

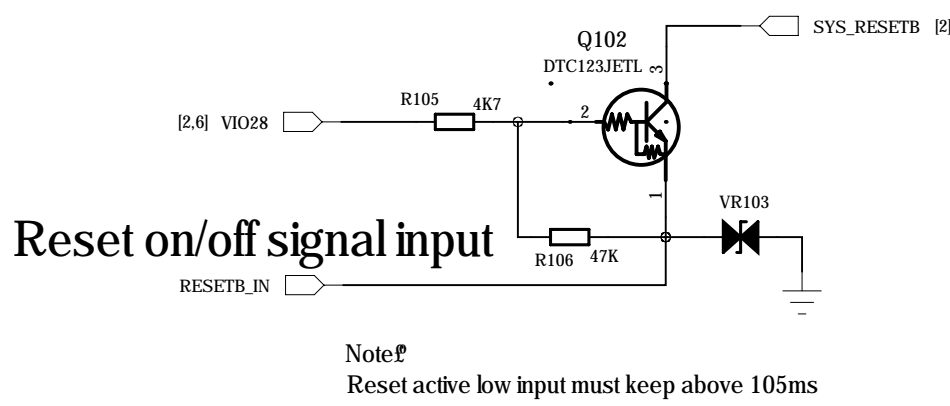

# BATT CON

Battery Temp DET

# RESET KEY

# POWER KEY

Note:  
The module power on sequence must after the MCU and the power on diagram as below timing chart  
As shown in figure, Application processors need to control the formation of POWER\_ON\_OFF pulse, the pulse width should be in 8 seconds or so.  
If the PPP connection has been established, please disconnect

POWER\_ON\_OFF

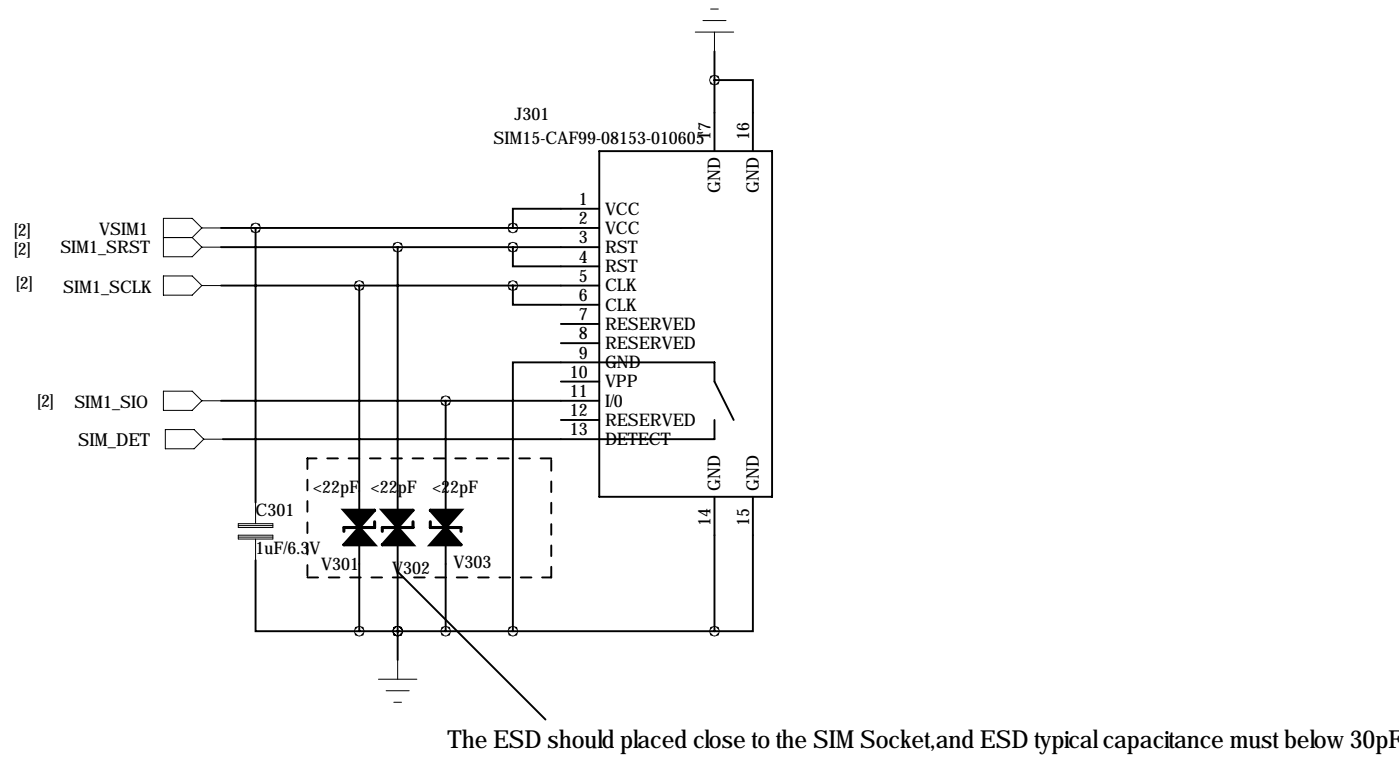

RESIN\_N

# UART PORT1

Connection of All Functional UART Port for 3.3V System

- Note#
1. CTS&RTS will be used for HW flow control when mass data has been sent.
  2. When AT+QSClk=1 is set on the module, customer's application can control
  3. When DTR is set to high level, and there is no on-air or hardware interrupt, such as GPIO interrupt or data on serial port, the module will enter into sleep mode automatically.
  4. RI will output an indication signal when activity such as voice call or SMS is coming.
  5. DCD is mainly applied in modem communication (PPP), the active status represents the communication link has been set up.
  6. Please pay attention to the level match of UART in product application.

NOT TO BE USED, COPIED, REPRODUCED IN WHOLE OR IN PART, NOR ITS CONTENTS REVEALED IN ANY MANNER TO OTHERS WITHOUT THE EXPRESS WRITTEN PERMISSION OF MOBILETEK.
