

L651

NB-IoT+GSM/GPRS+(GNSS)

L651 is a NB-IoT+GSM/GPRS+(GNSS) module for LCC package, with stable and reliable performance. It supports low/ mid bands operation defined by the 3GPP R13/R14, dual frequency GSM/GPRS (900/1800) Module and integrated high-performance global positioning navigation chip.

L651 size is only 24*20*2.4mm and very convenient for SMT. It can meet the needs of customers for small module products and facilitate customers to reduce product size and optimize product costs. It can be widely used for various products and equipment of NB-IoT/GSM/GPRS/GNSS.
